

Power Products, LLC Acquires Progressive Industries

Menomonee Falls, WI:

Power Products, LLC announces its acquisition of Progressive Industries. Based in Apex, NC, Progressive Industries is a recognized leader in the design and manufacture of surge protection equipment, adapters, and connectors for the RV industry.

“Power Products and Progressive Industries share a common vision to provide innovative safety and performance products to the recreational vehicle industry”, said David Scheer, CEO-Power Products LLC. “This acquisition supports and strengthens our strategic plan to provide mission-critical mobile solutions and is a great addition to our portfolio of leading brands.”

Chris McClain, Division President – Power Products Marine and Mobile added, “New generation RV’s are now being built with an increasing amount of electronic equipment, and Progressive Industries has responded by developing leading products that provide reliable electrical protection for the consumer. Progressive Industries’ culture of innovative product development is an ideal fit with our company; specifically with the ParkPower brand.”

Progressive Industries will continue to operate in Apex, NC under the current management team as the new partnership works together developing world-class products and solutions for the benefit of our mutual customers.
